

WHAT IS CLAIMED IS:

1. A vehicular lamp used for a vehicle, comprising:
a semiconductor light emitting element for generating light used for said vehicular lamp; and
a current controlling unit for changing a current supplied to said semiconductor light emitting element based on brightness around said vehicle.
2. A vehicular lamp as claimed in claim 1, wherein said current controlling unit reduces said current, if said brightness around said vehicle is higher than a predetermined level.
3. A vehicular lamp as claimed in claim 2, wherein said current controlling unit reduces said current, if said vehicle is stopped.
